

Chris Weiner

Creative problem-solver with a talent for developing lean solutions in the least amount of time. Business focused through design and execution of strategic plans while maintaining a focus on customer success.

WORK EXPERIENCE

Software Engineer/Team Lead - UAS Pilot , Nebraska - Dept. of Transportation

Lincoln, NE • April 2020 — Present

- Coached 5 - 10 Senior and Junior developers in creating a more test driven lean development process increasing completion time of projects by 26%
- Lead business owners through discovery of their business needs by Storyboarding their current processes to determine the tech stack that best resolves the identified problem(s) while advising on scalability of proposed solutions.
- Led 5+ Senior and Junior engineers through onboarding defining best practices and role expectations. While helping them develop a plan and goal to better measure their success.
- Led a development team of 5 to re-engineer Nebraska State Police accident reporting process transitioning them from paper to a full Content Management solution (OnBase).
- Led a team of 4 through technology research and implementation of NDOT's UAS - Drone program. To include the UAS planning and data processing web application using NextJS, .NET Core API, and SQL
- Serve as a Pilot and data processing engineer saving the state of Nebraska \$650K+ in Aerial survey and stockpile volumetric data processing.

ECM Administrator/Senior , Nebraska - Department of Transportation

Lincoln, NE • April 2018 — April 2020

- Provide "level 2 support" for 200+ tickets yearly which includes development of minor/major enhancements, defect fixes and provide work around to business problems
- Led a team of 8+ peers in creating a suite of developer guides, automated tests and best practices using Sellenium, Figma, Microsoft Visio, SharePoint, and Azure DevOps
- Completed 11 major projects using AGILE project development working closely with the team to develop, test and maintain a variety of OnBase and .NET API's
- Served as technical liaison for inter-agency merger of Department of Aeronautics and NDOT Mentored 2 junior developers on "level 1" and "level 2" support

Student Work Study - IT Quality Assurance, Nebraska - Department of Transportation

Lincoln, NE • November 2016 — April 2018

- Collaborated with 20 software engineers to understand the features and architecture of multiple web-based application to carry out testing with 100% efficiency.
- Created initial .NET repository of 100+ Coded-UI tests by Microsoft and eventual oversight of the transition to Selenium for all automated testing.
- Assisted in Azure DevOps test association both on demand and on build/deployment reducing bugs on deployment by 32% over 5 projects.

General Contractor / Co-Owner , TGBS Construction

Lincoln, NE • February 2014 — November 2016

- Led 4 teams in executing scheduled construction contracts to include Commercial and Residential construction.
- Audited and approved weekly timesheets submitted by both Employee's and contractors.
- Negotiated prices, optimal design, requirements, and scheduling of 150+ construction projects.
